About the client	<p>Kloosterboer network Kloosterboer has sixteen branches operating in the Netherlands, France, Sweden, South Africa, Canada and the United States. In total, we have more than 3,500,000 m3 of storage capacity where more than 500,000 tonnes of goods, both food and non-food, can be stored.</p> <p>Optimisation, facilitation and management Kloosterboer Logistics provides its clients with flexible, transparent and independent logistics and supply chain services. Taking the burden away from clients when it comes to logistics work and optimising the supply chain from start to finish are paramount. As logistics specialists, we become your partner, manage the supply chain on your behalf and optimise both the financial and operational side of trading.</p> <p>The ideal logistics partner As part of the Kloosterboer group, Kloosterboer Logistics has access to a vast set of resources from its entire range of facilities and through its employees providing a complete logistics package and making us the ideal logistics partner.</p> <p>Flexible, independent and customer & quality focussed Kloosterboer Logistics addresses the particular logistical needs of each and every client. We provide integrated and cold store independent solutions which incorporate and reflect every aspect of our core values: flexibility, independence and client and quality focus.</p> <p>Sustainability As market leader in the storage and distribution of temperature controlled products, Kloosterboer continues to contribute to achieving a sustainable world. Kloosterboer is</p>

proactive in this field and takes the initiative when it comes to sustainable developments. This is an important ambition for our organisation and therefore, also for our employees. On a day to day basis, we work on continuously reducing the impact of our activities on the environment. Examples:

- developing automated warehouses that use 37% to 45% less energy compared to a conventional warehouse
- installing wind turbines and solar panels (e.g. Vlissingen and Maasvlakte)
- consolidation of transport and use of energy saving means and modes of transport (barge, rail, LHV)
- energy-efficient LED lighting used in a well designed lighting plans across every Kloosterboer location
- sustainable expansion according to the Dutch Green Building Council standards. An example of this is the **BREEAM-NL** certification, 3 star ("very good") new construction certificate awarded for the expansion of the Kloosterboer Delta Terminal

Kloosterboer is affiliated with the Lean & Green network and is the first cold store company to be awarded the Lean & Green Award. This is the first step towards achieving our ambition of reducing our CO2 emissions by 20% within 5 years
