BIOTERRA University of Bucharest is a private higher educational institution of public interest which is part of the National Educational System, in accordance with the provisions of the accreditation law no. 480/2002.

During 19 years of activity of BIOTERRA University made a success out of establishing its own personality and a solid position within the domain of Romania higher education.

BIOTERRA University by its management structure used in fighting for a dynamic education and in line with programmatic requirements of the European Union.

We specified that is the only university in the national private education, which

had the courage to approach it from the very beginning, faculties and specializations in the field of engineering. In this context is more compared to other universities an excellent material base with exceptional spaces, laboratories and research units, endowed with high-performance equipment at the level of institutions of profile in the European Union. Also, the process of education is more complex, in which the practice is the formative training of first importance.

BIOTERRA University is the first and the only contemporary private university that established, authorized and accredited unique specializations in the fields of agro - tourism management, phyto-sanitary and zoo-veterinary police, which were taken over by public state universities at a provisional authorization level.

All these achievements are based on a real and dynamic approach of the necessary of human resources, having a higher education qualification in the vast domain of the alternatives necessary to agro-alimentary processes, control and legislation within the framework of the competence fields.

In this sense, for the first time in Romania, within BIOTERRA University, a unique major was outlined, namely “Agro -tourism Engineering and Management”,

The Bioterra University's administrative headquarters located at meeting of Baneasa Lake and Lake Grivita, united by a stavilar.

Bioterra Alexandria Subsidiary

Bioterra Slobozia Subsidiary

Bioterra Focsani Subsidiary

In the meantime, based on background analyses which were directly performed, BIOTERRA University diversified its curricular area, approaching new majors which were able to cover the breaches in the labor market created by the new socio-economic system. Thus, BIOTERRA University created and established new major specializations such as “Control and Expertise of Alimentary Products” and “Engineering of Alimentary Products”, majors accredited for the first time in Romania within our institution.

Considering the complexity of the approached fields, that have a juridical side as well, BIOTERRA University in Bucharest developed and accredited a “Law” specialization with applicability in the competence fields of the others.

During the years of study, our students are confronted with a series of subjects that ensure them a high qualification in the respective competence fields.

The analytical programs are dynamic and fully in compliance with the requirements of a

Bioterra Buzau Subsidiary

modern and efficient education, capable to integrate without major changes within the standards required by the future joining of Romania to the European Union, so that our graduates can successfully live up to the expectations of the Romanian and foreign labor market.

The university year 2011-2012 represents a fresh start for the Romanian higher education, and BIOTERRA University, by reorganizing its bachelor fields, majors and teaching plans, has accorded itself to the “*Implementation of the Bologna Process*” in the Romanian universities, with a view to international acknowledgement of degrees in order to achieve the integration of our graduates in the ***European Union***.

With the advent of this new century and millennium, BIOTERRA University in Bucharest widely opens its gates for all young people, desirous of knowledge and accomplishment on a personal and professional plan, offering the guarantee of a superior education within an original institution of modern and efficient education.

CHAPTER I

PRESENTATION OF THE HIGHER EDUCATION INSTITUTION "UNIVERSITY BIOTERRA OF BUCHAREST"

1.1.The judicial and organization background

*Rector, Prof. PhD. Eng. Floarea NICOLAE
Assoc. Member of the Academy of
Romanian Scientists*

Rectorate – "D" building

The BIOTERRA University is a high education institution relatively young, at the beginning being a constituent part of the University BIOTERRA University foundation of Bucharest which was initiated by some remarkable personalities of the didactic and scientific domain in the applied bioengineering, economic engineering, rural tourism, alimentary industry and phyto-sanitary and zoo-veterinary control of the goods, law and legislation. Field the statute and structure of the BIOTERRA University Foundation were certified according to the legal procedures by the **Civil Decision no. 88 from the 19th May 1994** of the District 1 Low Court, file 96/P.J/1994. With the implementations and development of the organization and accreditation of the specializations in the high educations system coordinated the N.C.A.E.A., the specializations existing in the BIOTERRA University Bucharest were authorized to function temporary by the H.G. nr. 294/1997 and in Official Gazette of Romania part first, 130/25.06.1997 and in every other government decisions issued till 2002.

In 2002, after achieving all the accreditation levels, the **BIOTERRA University** in Bucharest was **accredited by the 480/2002 law**, published in

Romania Official Gazette no.512 from the 17th July 2002. According to the first decision of this law, ***BIOTERRA University of Bucharest is a high education institution, juridical person of private law and public utility, part of the national education system***, with the residence in Bucharest nr .81 Garlei Street district 1.

1.2. The name and residence of education supplier

In the BIOTERRA University structure there are included according to the regulations of the establishment and ***G.D. nr 635/2008***, published in Official Gazette of Romania first part no.834/11 December 2008, the following accredited faculties:

- ***Faculty of Agro-Tourism Management*** accredited in 2002 at the same time with the promulgation of the 480/2002 law with the specialization ***Engineering and Management in Public Alimentation and Agro-tourism*** in the license field ***Engineering and Management*** having 4 years of study daily frequency and reduced frequency, with 240 credits.

- ***Engineering of Alimentary Products Faculty*** accredited in 2005 by the N.C.A.E.A. with the specialization of ***Engineering of Alimentary Products*** heaving also 4 years of study with 240 credits daily and reduced frequency courses.

- ***Control and Expertise of Alimentary Products*** accredited in 2005 by the N.C.A.E.A with the specialization the ***Control and Expertise of Alimentary Products*** in the field ***Engineering of Alimentary Products***, heaving 4 years of study-daily and part-time frequency courses, 240 credits, too.

- ***Faculty of Consumer affairs and environmental protection Bucuresti***, authorized in 2012, heaving 4 years of study, daily courses - 240 credits.

- ***The Faculty of Law*** accredited in 2005 by the N.C.A.E.A in the field of law, heaving 4 years of study, daily and reduced frequency courses – 240 credits.

The BIOTERRA University in Bucharest has also the following authorized faculties and specialties:

- ***Faculty of Agro -tourism Management in Buzau***, Buzau county, with the specialization ***Engineering and Management in Public Alimentation and Agro-Tourism***;
- ***Faculty of Agro -tourism Management in Focsani***, Vrancea county, with the specialization ***Engineering and Management Alimentation and Agro-Tourism***;
- ***Faculty of Agro -tourism Management in Alexandria***, Teleorman county, with the specialization ***Engineering and Management in Public Alimentation and Agro-Tourism***;
- ***Faculty of Agro -tourism Management in Slobozia***, Ialomita county, with specialization in ***Engineering and Management in Public Alimentation and Agro – Tourism***;
- ***Faculty of Control and Expertise of Alimentary Products in Buzau***, Buzau county, with the specialization ***Control and Expertise of Alimentary Products***;
- ***Faculty of Control and Expertise of Alimentary Products in Alexandria***, Teleorman county, with the specialization ***Control and Expertise of Alimentary Products***;
- ***Faculty of Control and Expertise of Alimentary Products in Slobozia***, Ialomita County, with the specialization ***Control and Expertise of Alimentary Products***.

The specializations presented, came out during the years, starting with the authorization to the accreditation in the Government Decrees which established these aspects of which we can reveal G.D. 535/1999; G.D. 379/2000; G.D. 916/2005; G.D. 676/2007; G.D. 635/2008.

Referring to the specializations that function in the structure of the faculties of the BIOTERRA University of Bucharest – we must emphasize that this university was the initiator of two unique specializations: ***Engineering and Management in Public Alimentation and Agro – Tourism and Control and Expertise of Alimentary Products***; specializations that were recognized immediately even from the beginning by the number of enrolled students, as well as a series of faculties in some universities (UASVM Bucharest – Cluj) authorized to develop some license studies at these two specializations initiated by the BIOTERRA University of Bucharest.

1.3. Mission and strategy objectives

During the development of the activity, the BIOTERRA University succeeded to create its own personality, and a strong position in the field of the Romanian high education, in the modern study curricula as well as the education spaces, but especially with the didactic staff which lead and organize the didactic and research activity.

The didactic and research mission of the university is meant to train specialists with complex profile who can use efficiently and ecologically the natural, environment, financial and human resources, in the specific tradition of the Romania people, with the integration of the agro-alimentary, touristic and judicial values in an unitary conception of all the elements which lead to the achievement of some valuable performances in the European Community, as well as in the internal and international level.

The scientific research missions consists in the organization and development of the applied and fundamental scientific research, with concrete result in consulting scientific works, expert examinations, publications, as well as during the internal and international meetings, congresses, symposiums, round table meetings.

The curricula follow the promotion of the structure specializations as well as of other new specialization demanded on the market, as there were promoted the specializations of Engineering and Agro -tourism Management and Control and Expertise of Alimentary Products, which when they were initiated, they were the only ones in the Romanian high education system field.

With its own structures it is meant to achieve a superior quality of the education process and of the research works, making evident the beneficent parts, stimulating and regenerating specific to the high education system.

The University aims to keep and develop endlessly the professional and scientific research potential it has, to grow the consolidation of the specialization it offers nowadays, as well as initialing new specialties inside the institution.

Using always the valuable experience of the Romanian education system, and keeping in mind the integration of Romania in the European Union, the curricula are always made up to date, with a genuine scientific and cultural load, such as after following the study years, our graduates, can be able to face the competitive system of the market economy.

The mission of the BIOTERRA University of Bucharest is to create and develop an

area of study and scientific research for the students, didactic staff and research workers national and international standards.

- The main mission on long, medium and short term of ***Faculty of Agro -tourism Management*** with the specialization ***Engineering and Management in Alimentation and Agro-Tourism*** is contribute to immediately and efficiently at the diminutions of superior staff with high specialization in the engineering and management field, able to use in an efficient way the natural, financial, human resources with the purpose of the development of the public alimentation and agro-tourism network, modern and efficient, which can perform an activity as a result of a high level management in this field.

With the subjects existing in the teaching plans as well as the specialty practical period the students perform we aim to evaluate the touristic and Agro -tourism resources of the regions of own country.

- The main mission of ***Faculty Engineering of Alimentary Products*** with ***Engineering of Alimentary Products*** specialization is training engineers with high specialization in processing and reevaluation of the alimentary products, of the technologies in the alimentary industry, which can integrate immediately in the activity of actual a future commercial societies in this field, able to perform in production the demands imposed by the integration of Romania in the European Union.

The subjects referring to obtaining „The Ecological Product” are prior in the teaching plans, taking into account the big potential an own country has in this field, as well as the demands on the E.U. market.

- ***Faculty of Control and Expertise of Alimentary Products*** with the specialization ***Control and Expertise of Alimentary Products*** the first specialization accredited with this profile of the Romanian University education, has as a strategy aim the training of specialists with high level professional qualification to ensure in the commercial societies of profile the technology process from the production, depositing to delivery and valuation, with the purpose to ensure the alimentary security and protection of consumers, including preventing the alimentary bioterrorism.

- ***Faculty of Consumer affairs and environmental protection Bucuresti-*** authorized in 2012. Consumers affairs is a policy promoted by every state. In April 1985 The United Nations Organization established through 39/248 resolution a set of governing principles for the consumers’ protection. These are meant to provide the government of every country a legal framework which can be used in order to develop and substantiate consumers’ protection policy and laws. Consumers Affairs and Environmental Protection trains specialists to ensure a living and working environment with healthy people. It also trains them to apply in a scientific and operative manner the most efficient methods in order to protect the consumers and the environment. This specialization represents the outcome of a partnership between Bioterra University , The Environmental Protection Agency, The Environment Department, The consumers affairs and environmental protection agency. It has a pragmatic teaching plan with interesting subjects taught by great specialists who have also a huge experience in different specific positions. Consumers Affairs and Environmental Protection trains highly qualified specialists who will work in consumers affairs and environmental protection, will be capable to use in an efficient manner human and natural resources in order to develop and adapt this field to the European standards and demands.

The environmental protection activities aim to use rationally the resources , to relate town planning actions to the environmental protection measures, to adopt less polluting technologies, to equip the pollution generators with appliances that can prevent noxious effects over the environment and can salvage useable residual materials. Graduates will be legally able to work in the sanitary and veterinary field, public health, consumers affairs, environmental protection. These qualifications are impose on the labor market by the developing trends of the food industry and the food security and safety. On the labor market specialists in this field are needed because there wasn't such a specialization before. All the students will make their internship in the European touristic resorts in Nurnberg and Arrach in Germany. The resorts are owned by Bioterra.

- The main mission of **Faculty of Law** with **Law** – specialization is to ensure the training of high level specialists in the judicial system, who knows very well the Roman - nian European Law, the especially doctrine and jurisprudence.

The Law Faculty mission consist also we training the students as good specialists in the Romanian society, to be constantly guided by the justice spirit, honesty and integrity, the knowledge and observance of the actual legislation central and local administration, in the public and private institutions with judicial personality, such as to ensure the juridical substance necessary in the action of law. Faculty mission is so specialized training of students and the cultural development of their science.

Faculty of Law by specialization in the “Law”, in order to fulfill its mission, aims redoubtable preparation of specialists in this field. Faculty has the mission specialist training of students and the cultural development of their science, each program of study based on the correspondence between school and university qualifications followed.

Under the **strategic plan**, elaborated for the period 2011-2014, the BIOTERRA University of Bucharest proposed to provide the following priority objectives:

- aligning at the national and international standards on parameters to assess internal and international content and quality of curricula;
- establishment of a single professional competence criteria in assessment and promotion body, selection area and academic personnel, technical-administrative and economic;
- improvement of inter-university doctoral training, internships and graduate studies in the country and abroad;
- participation in research programmes on domestic and international, on the basis of contracts, in accordance with the legislation in force and the standards laid down by Romania Ministry of Education;
- educating students in the spirit of knowledge, maintaining and development of national heritage, as well as protection of the environment;
- realization of mutual exchanges of teachers and students with similar institutions of higher education in the country and abroad, in order to improve the students, didactic and modernization;
- promote participatory democracy and pluralism of opinions among teachers and students;
- socio-economic protection of members of the academic community by ensuring optimal conditions for affirmation and for promoting activities with students;
- the development and modernization of the base material and didactic-scientific one, through the development and implementation of the plan of investments set forth on a medium and perspective;

- diversification of sources of financial income from collaborations and research activities;
- improving institutional capacity through continuous implementation of a quality management system to be able to ensure the integration of education and research in the European Higher Education Space.

The mission and objectives assumed customize BIOTERRA University under the system of national and european space of higher education strategic plan for the period 2011-2015, highlighting this fact.
